

ABSTRACT OF THE DISCLOSURE

An electronic image-capturing apparatus includes: an image-capturing element that captures an image of a subject
5 and generates electronic image information; a recording device that records the electronic image information that has been generated in a recording medium; a registration device that registers inherent information with respect to a registrant;
an information detection device that detects inherent
10 information with respect to a user of the electronic image-capturing apparatus; an information verification device that references the inherent information with respect to the user detected by the information detection device with the inherent information registered in the registration device;
15 and a control device that allows an image-capturing operation to be performed on the electronic image-capturing apparatus if it is decided by the information verification device that the two sets of inherent information match.
